Market Comments

The Federal Reserve heads into 2026 facing a slew of political and policy challenges. Crucial issues include a new chair and an economy fed by both tailwinds and headwinds. Coming off three consecutive interest rate cuts, the central bank is expected to follow a more tepid path for the year ahead in which additional cuts could be hard to come by considering expectations for solid growth and ongoing inflation pressures. Some Market experts sees the data pointing to two cuts this year while outliers seeing labor market weakness pointing to three cuts. The upcoming Employment and CPI Data will give more clarity about the FOMC January meet. The QAR profit rates is expected to move gradually in line with the FED rate cuts and investors should expect the profit rates to go lower in line with that.
